

- file name: IT_lexicon.csv
- file contents: data
- file format: csv (comme-separated-values)
- size of file (in bytes): 858 KB
- other relevant dimensions:
 - number of records: 9072
 - number of fields: 6
(sentence,verb,voice,pattern,pattern_morph,pattern_fillers)

Documentation:

The file contains a database table. Each record (row) corresponds to a verb occurrence in *the Index Thomisticus* Treebank. The fields are the following:

1. sentence: sentence of the Index Thomisticus where the verb occurrence appears;
2. verb: verb lemma of the verb occurrence;
3. voice: voice of the verb occurrence ('A' for active, 'P' for passive, 'D' for deponent);
4. pattern: syntactic pattern containing the syntactic labels of the arguments of the verb ('Sb' for subject, 'Ocomp' for object complement, 'Pnom' for predicate nominal, 'Obj' for all other arguments);
5. pattern_morph: syntactic pattern containing the syntactic labels of the arguments of the verb plus morphological information on the case or mood of the arguments;
6. pattern_fillers: syntactic pattern containing the syntactic labels of the arguments of the verb plus morphological information on the case or mood of the arguments and lemmas of the arguments.

The syntactic annotation guidelines for the Index Thomisticus Treebank are available at <http://nlp.perseus.tufts.edu/syntax/treebank/ldt/1.5/docs/guidelines.pdf>.
